

Datawiz.io

Look to your data differently

**How much will you make
at next year ?**

What matters

Build your own analytic model with our Machine Learning Applications

Smart Prediction

This app can do prediction and classification. System will run your data automatically with a set of algorithms, and choose the result with smaller a margin of error. You will see which features influence your result.

[User Case](#)

Advanced Prediction

In advanced prediction, you can choose the features that participate in the model building and the resulting feature to be calculated. Get more involved and find more insights of your own data. [User Case](#)

Segmentation

App can find clusters (segments) in your data. Get more understanding of the character in different segments. [User Case](#)

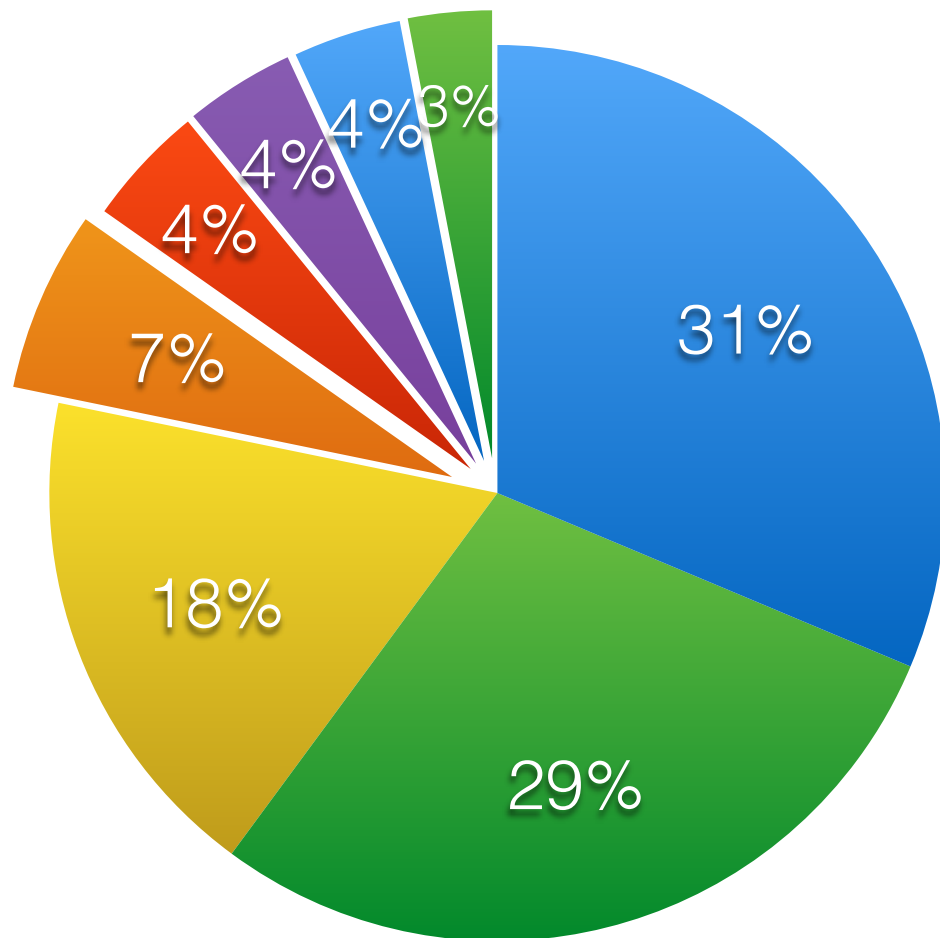

Machine learning

Run the most popular machine learning algorithm on your dataset. Build your own model and compare the result from different model. Analyze the structure of your data and get more insights. [User Case](#)

Too less people doing science
and they are **not ready to pay**

“Fortuneteller”

Corporate leader

We provide the
actionable solution

Benefits

- Put customer inside every decision
- Build customer loyalty
- Provide a general perspective
- Put the right products in the right places
- Predict the future
- Tread customers as individuals

Supermarket got tons of data from different cards and systems.

Thank you
