Web Developer/Programmer for Fast Growing Startup - mycujoo.tv - world's football TV

Web, Mobile & Software Dev | Desktop Software Development | Posted 3 hours ago

Hourly Job
Full Time
More than 6 months

Intermediate Level
I am looking for a mix of experience and value

Details

Summary

We are searching for outstanding senior web developers to be responsible for developing innovative, reusable Web-based tools for progressive online Fast growing Broadcast platform. Our web developers work closely with our technical managers, strategists and design team members to develop specifications and make recommendations on the use of new and emerging technologies. Programming, Design and Database administration are all elements of this position.

Responsibilities

• Work closely with Technical Managers and other members of the

Development Team to both develop detailed specification documents with

clear project deliverables and timelines, and to ensure timely completion of

deliverables.

• Produce project estimates during development meeting, including expertise

Aldrin L.

Architect, Backend Engineer (Scala, Java, Hadoop)

hadoop | java | amazon-web-services | 42 more

Overview

Over the past 15 years I've worked with projects ranging from Startups to Fortune 100s. From C++ to Scala, past assignments involved:

- Protocol Design in C++/Delphi
- Java API Publishing
- Maven Plugin Development
- Distributed Systems using RESTful backends
- Scala / Akka Design
- Jenkins Plugins Writing

On a daily basis, I spend between Systems Architecture, Build Planning, for Hadoop and Restful Backends, specially under Amazon Web Services. Oh, I'm also a Cloudera Certified Ad...
